

AQUADIVE BATHYSCAPHE 100

INTRO

With the Bathyscaphe 100, we set out to create a new classic, and protected it using a hightech scratch-free DLC coating, and a state of the art scratch-free Ceramic bezel insert. A sports watch that looks ready to tackle any situation you might want to throw at it. While it looks straight out of the '60's, it's a thoroughly modern dive watch with a depth rating of 1000 meters.

The matching black rubber strap adds to the retro feel of this watch, while insuring all-day comfort. The buckle is signed AQUADIVE and is DLC coated.
